

## How to create an ERC-20 Wallet

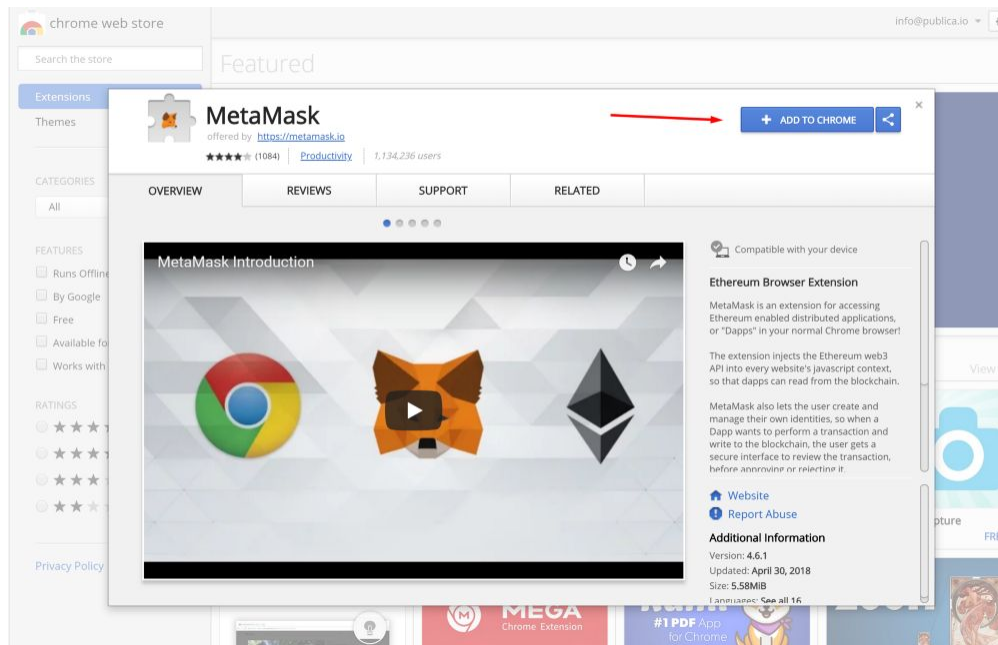

1. Open <https://metamask.io> website or search for “Metamask extension” in your favorite browser (you can install Metamask for [Chrome](#), [Firefox](#) and [Opera](#) browsers).

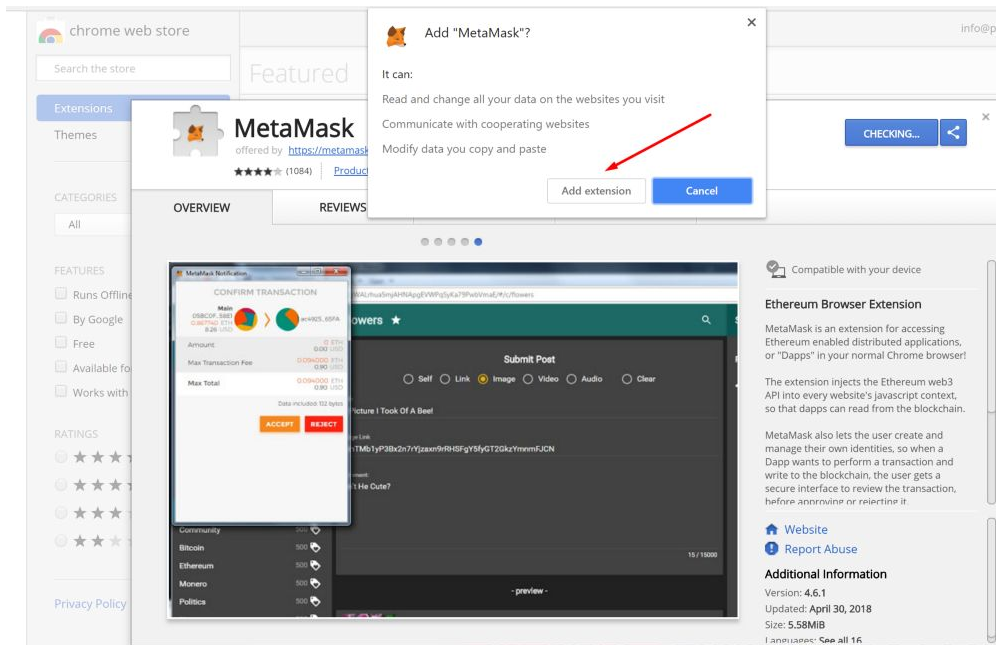

In this tutorial we will show you how to install MetaMask extension for Chrome

2. Click **Add to Chrome** to install MetaMask as Google Chrome extension.

### 3. Click Add Extension.

You have successfully installed MetaMask extension. That was easy, isn't it? Now, it is time to add your existing cryptocurrency wallet.

If you don't have a wallet yet, you can create one straight away.

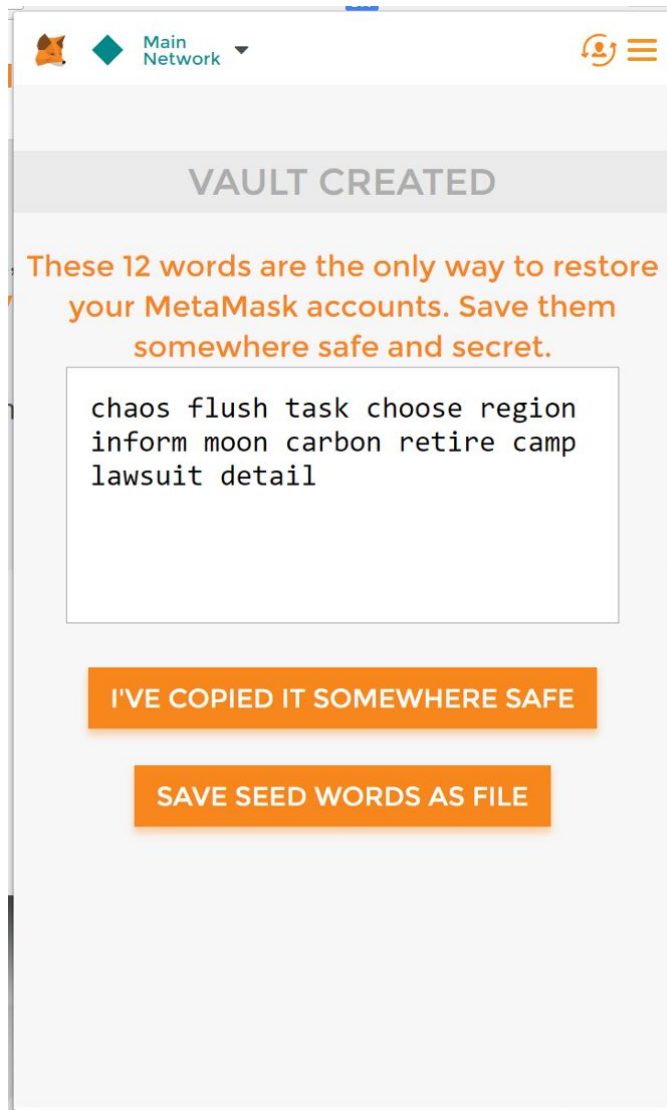

If you already have existing wallet to store your tokens, follow instructions here on [How to import existing wallet to MetaMask](#).

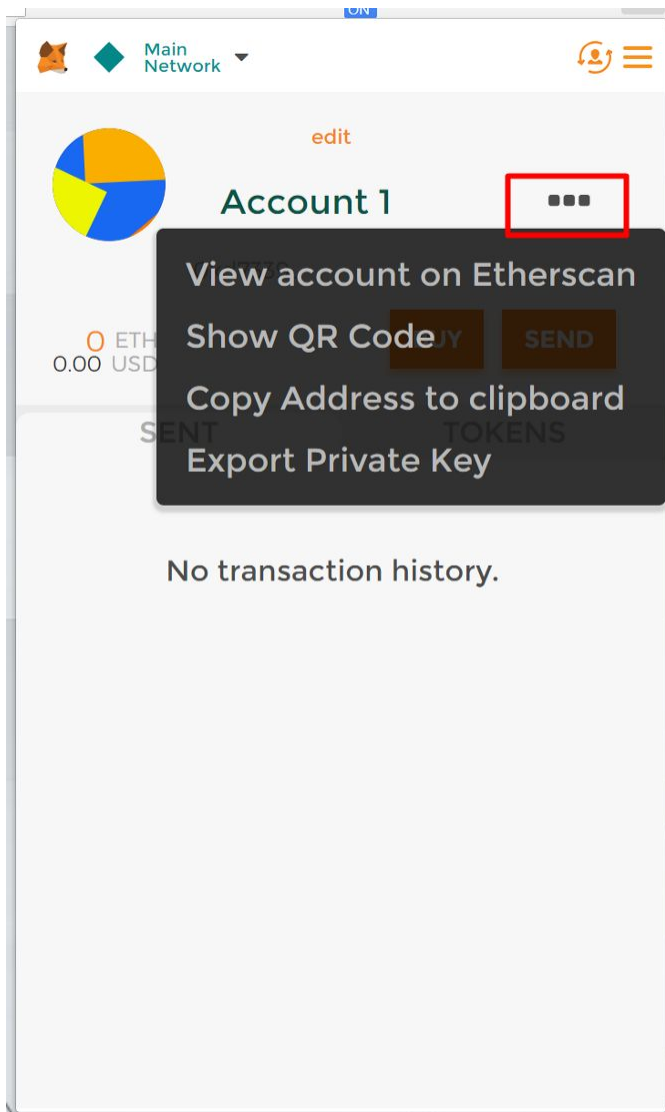

## How to create a new wallet in MetaMask?

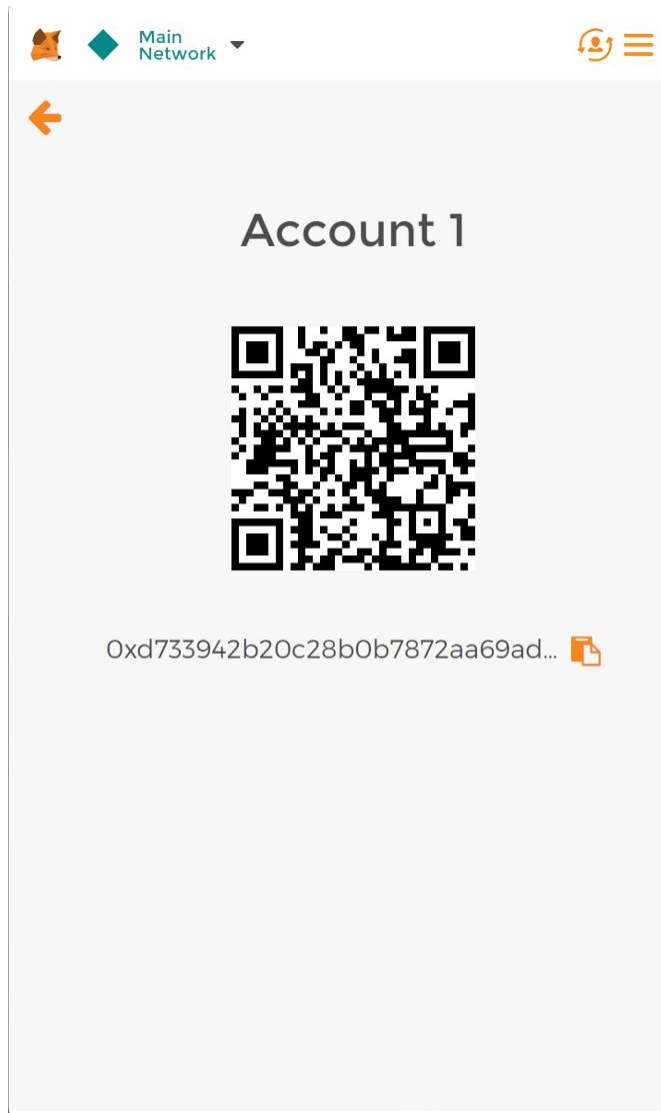

1. When the extension is installed, click on the icon in the upper right corner to open the MetaMask, read and accept the terms.
2. Create a strong password and click **Create**.
3. You will see a 12 words seed phrase. Save seed words as a file or copy them to a safe place and click “**I’ve copied it somewhere safe**”.

Congratulations! You have successfully created an account in MetaMask with a new wallet address!

Now you can view your address on Etherscan (Ethereum blockchain explorer), check the QR code, copy your wallet’s address to clipboard or export your wallet’s private key:

Now, when you have an account created, you can buy CUR8 tokens and ETH tokens and send them to your newly created wallet address.
